
CAPABILITIES STATEMENT

Company Overview

With a strong foundation in engineering, Engenesys designs and manufactures custom equipment and components for manufacturing processes. Our skills and experience in mechanical engineering, design development and manufacturing allow us to provide robust and reliable solutions for unique manufacturing process requirements. The company was founded in 2009 and is located near the Cincinnati International Airport in northern Kentucky.

Capabilities

Engenesys provides engineering services including automation capability studies and complete 3D mechanical / electrical equipment and component designs. With our network of reliable machining and fabrication partners, full turnkey projects can be manufactured, delivered and installed at the customer's site. All final assembly, testing and quality control is performed at our facility. Engenesys' owners have completed projects and produced parts, tooling and equipment for subcontractors to prime government suppliers such as General Dynamics, BAE Systems, General Electric, Hamilton Sundstrand, and L3 Communications.
